Our Gadgets

Open Text Web Solutions allows you to systematically and efficiently set up and expand navigation on complex projects. Using the clear tree structure, you can keep track of your Web projects and make changes easily via the display in the browser.

Building a Web site, Intranet, or Extranet/Portal has never been simpler. Site Manager's intuitive tree structure facilitates project administration. Templates for a single page, or for your entire site, can be created and modified quickly and easily. New users are created with the authorization they require in just a few clicks.
